

Mini Project 2: Summer 22 OCC SPEC – Design and Simple website

Brief (Taken from Summer 22):

The software development company you work for has secured a new contract to develop a digital solution for GibJohn Tutoring.

GibJohn Tutoring currently provides customers with:

- face-to-face tutoring sessions
- access to learning resources
- support to develop understanding in different subjects.

The client (owners of GibJohn Tutoring) would like to develop a digital solution that will:

- provide interactive teaching and learning resources in a range of subjects
- provide access to digital content to encourage wider learning
- support assessment and monitoring of learner progress.

The client has carried out some market research with existing customers and tutors to identify features that could be included in the digital solution. The potential features suggested by the client are:

- collaborative teaching and learning tools
- accessibility features to support a wide range of users
- a learning reward system
- gamified learning.

TASK A: Produce a set of design documents for the digital solution you are proposing. The design documentation must include visual/interface designs using FIGMA.

TASK B: Using the design you have created, mock up at least 4 pages of the website . Ensure they are hyperlinked together. Although it should look like it “Works” it is a static representation of functionality only.

Non-Negotiables:

- A set of Figma designs for the minimum of 4 pages from his site you plan to make.
- A commentary explaining your design decisions.
- 4 html pages minimum
- An external CSS file linked appropriately
- Use of images and text as appropriate
- Consistent look / layout and feel throughout the four pages
- Well structured HTML code.
- Use of the div flex box model as shown in this example:
https://github.com/awatkin/occspec2526/tree/main/mini_project_01/version_2
- Suitable folder structure

What to submit:

- A zipped file containing:
 - Appropriate folder and file structure for the website
 - Index.html should be the home page / starting point
 - Appropriate subfolder for your designs and commentary
